TICK SAFETY INFORMATION

Start protecting your family today with these tips:

PROTECT YOUR FAMILY

- ✔ Spray an all-natural tick repellent on clothing before going outside, and conduct a tick check immediately upon returning.
- ✔ Put clothes worn outside into the dryer on high for about 15 minutes before you wash them to kill any ticks carried indoors.

PROTECT YOUR PETS

- ✔ Watch closely for changes in behavior or appetite as these are signs of tick-borne disease.
- ✔ Consult with your veterinarian about tick-borne diseases common in your area.

PROTECT YOUR YARD

- ✔ Keep grass on your property short and regularly clear the yard of all brush and leaf litter.
- ✔ Hire us to apply our national **organic** program compliant yard sprays routinely to eradicate all ticks around your home.

We are the only service provider of **PROGAEA™**, a safe and proven effective product to eliminate ticks from around your home.
